Capsule case · deboss spec

ZUMA Tides · silicone travel case for one 3 mL vial · Rev B · all dimensions in mm · replaces Rev A

STAMP MAP, UNROLLED, DRAWN TO SCALE

TWO DEEP STAMPS ON A SHALLOW MONOGRAM

crest, true size
13.5 × 12.9

wordmark, true size
36 × 5.9 (x-height 4.25)

monogram
4 mm

- **Front (180°):** the ZUMA crest, 13.5 mm wide, centred on the top half at 41.0 mm above the seat. Upright.
- **Back (0°):** the "zuma tides" wordmark, 36 mm long, reading up from the seat. The parting seam falls in the space between the two words: no letter crosses it.
- **Monogram:** 64 small crests (4 mm, small-size cut), 12 to a row, rows 5.5 mm apart and turned half a step on alternate rows. Pressed shallow, 0.12 mm, so they read tone on tone. A clear margin of 2.6 mm around both deep stamps.
- **Artwork:** vector files `zuma-crest-13_5mm.svg`, `zuma-tides-wordmark.svg` and `zuma-monogram-4mm.svg`. Do not redraw, thicken or swap the lettering for a font.
- **Deboss:** crest and wordmark 0.40 mm deep (±0.05), flat floor, 10° draft, 0.10 mm radius on the top edge. Smallest feature in the crest is about 0.3 mm: hold it; if the tool cannot, tell us before cutting.
- **Finish:** body matte (VDI 3400 Ref 27–30); stamp floors polished smoother so the marks read by sheen as well as depth.
- **Keep-outs:** nothing on the domes or the flat seat.

CAPSULE

- **Outside:** Ø 23 mm; 62.4 mm tall standing (64 mm tip to tip before the seat is cut).
- **Ends:** full hemispheres, R 11.5. The bottom is cut flat to a seat Ø 11.8 mm so the case stands upright.
- **Halves:** two halves join at a fine parting seam 31.2 mm above the seat; 0.3 mm wide, 0.3 mm deep groove.
- **Cavity:** fits one 3 mL vial with its crimp cap, snug, no rattle. Confirm against a physical vial.
- **Wall:** 3.0 mm minimum all round, ends included. The case ships in a padded mailer with no box, so it is the vial's only crush and drop protection: it must survive a 1.2 m drop onto concrete and a 20 kg load across the body with the vial unbroken.
- **Closure:** the two halves press-fit on an internal lip and stay shut through the drop test; supplier to design and prove it on the sample.
- **Material:** silicone, Shore 40–50A, opaque, colour through the body.

COLOURS, ONE PER RESEARCH AREA

Coral
`Dermal · #FF6A55`

Lemon
`Endocrine · #F4D63A`

Lime
`Tissue · #6CC93A`

Sky
`Metabolic · #36B3E8`

Lilac
`Neuro · #A57BF0`

Oxblood
`House · #6E1C2A`

Match to the hex values. Send a moulded swatch of each colour for approval before the run.

STAMP POSITIONS

- **Crest:** centre 41.0 mm above the seat, at 180° (the front). Width 13.5 mm. Upright.
- **Wordmark:** centre of the word space on the seam (31.2 mm above the seat), at 0° (the back). 36 mm long, runs from 12.5 to 48.5 mm. Reads bottom to top; the tops of the letters face the left as you look at the back.
- **Monogram rows** (height above the seat): 11.8, 17.3, 22.8, 28.3, 34.1, 39.6, 45.1. Odd rows start at 0°, even rows at 15°; pitch 30° (6.02 mm). Positions inside the margins are left out.
- **Datum:** 0° is the centre line of the back; the front is opposite at 180°.
