# Vial label · print spec

ZUMA Tides · wrap label for the 3 mL vial (Option C: plain clear vial, Oxblood cap) · eleven SKUs · Rev 1 · 25 Oct 2026

## THE LABEL

| | |
|---|---|
| **Size** | 43.0 × 20.0 mm trim, corners rounded 1.0 mm. Wraps a Ø 16 mm vial with a 7 mm gap at the back. |
| **Bleed** | 1.5 mm all round. Each print file is a 46 × 23 mm page with the bleed built in; no crop marks. |
| **Safe area** | 1.0 mm inside the trim. Nothing that matters sits outside it. |
| **Material** | White polypropylene film (BOPP), permanent acrylic adhesive rated for −20 °C storage, matte laminate. Must hold through freezer storage, condensation and an alcohol wipe. |
| **Print** | Digital CMYK, full bleed, one design per SKU. No white ink, no spot colours. |
| **Colour** | Match the hex values below. Oxblood #6E1C2A is the brand colour on every label: hard proof it before the run. |
| **Lot box** | The white box top-left (LOT / FILLED, 11.3 × 3.4 mm) stays blank for the lot number and fill date: inkjet or thermal transfer at filling. If thermal transfer, order the laminate as TT-receptive. |
| **QR code** | 9.6 mm, links to that product's lot reports (zumatides.com/lots#CODE-). Scan the proof before approving. |
| **Supply** | Rolls for an applicator (76 mm core, one across, 3 mm gap; confirm unwind direction with the applicator) or sheets for hand labelling. Order vials + 10% per SKU for set-up and spoilage. |

## ON THE VIAL

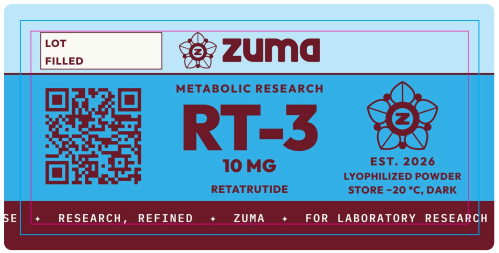

- **Placement:** bottom edge 3.0 mm above the base of the vial; the ZUMA logo and product name centred on the front; the gap at the back.
- **Cap:** 13 mm flip-off, Oxblood #6E1C2A, on every SKU; silver aluminium crimp; grey butyl lyophilization stopper.
- **Vial:** 3 mL clear borosilicate, Ø 16 mm, 35 mm tall with the cap, 13 mm crimp neck.

## COLOURS

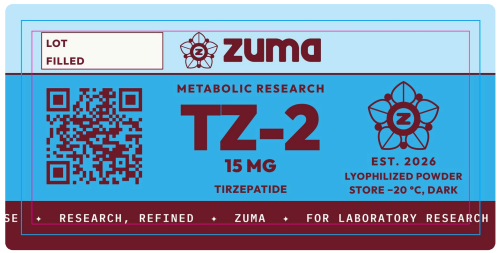

Oxblood #6E1C2A · Coral #FF6A55 (Dermal) · Lemon #F4D63A (Endocrine) · Lime #6CC93A (Tissue) · Sky #36B3E8 (Metabolic) · Lilac #A57BF0 (Neuro). Each label also uses the light tint of its colour for the top band; the files carry the exact values.

## THE ELEVEN LABELS · PROOFS

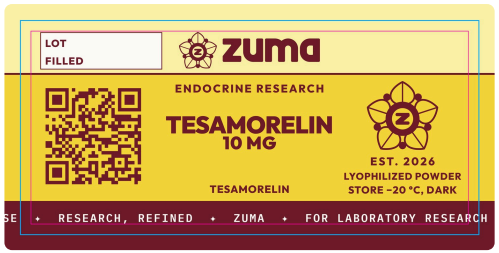

Blue: trim. Pink: safe area. Outside the blue line is bleed. The proofs carry the lines; the print files do not.

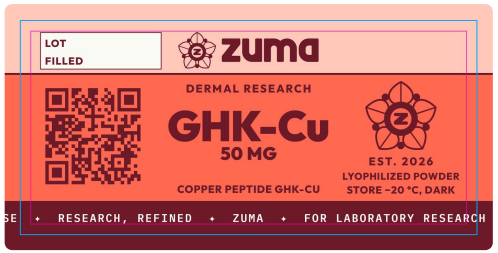

01 · RT-3 · 10 mg

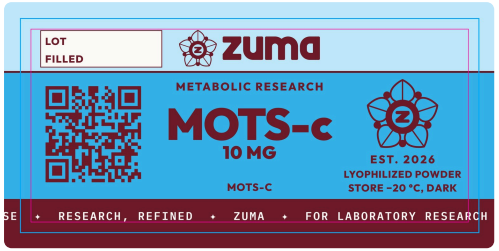

02 · TZ-2 · 15 mg

04 · Tesamorelin · 10 mg

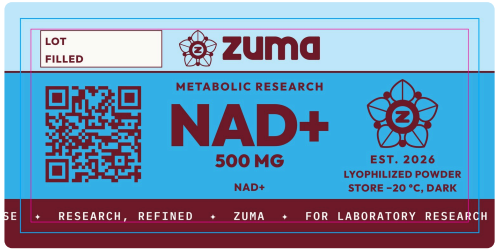

05 · GHK-Cu · 50 mg

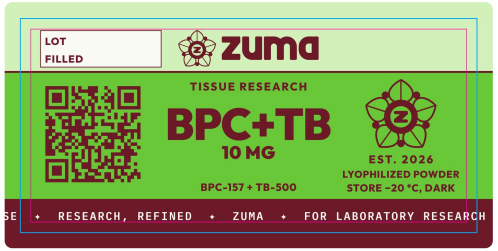

06 · MOTS-c · 10 mg

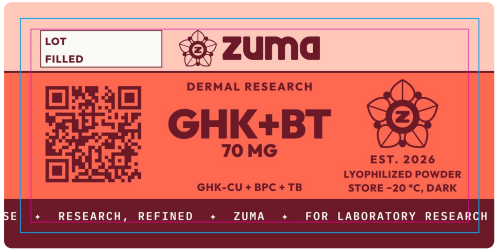

07 · CJC+IPA · 10 mg

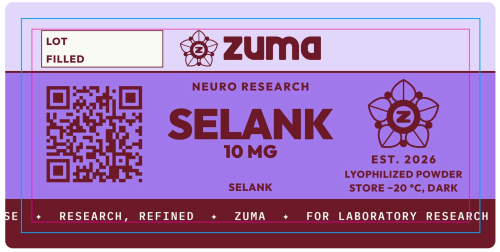

08 · NAD+ · 500 mg

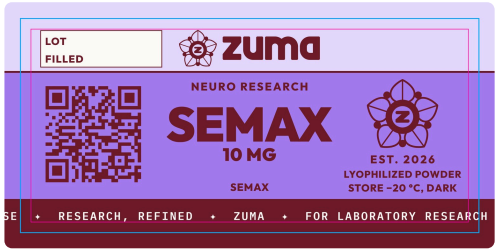

09 · BPC+TB · 10 mg

10 · GHK+BT · 70 mg

11 · Selank · 10 mg

12 · Semax · 10 mg

## FILES AND SKUS

| No. | Label | Compound | Fill | Area | Print file | QR |
|---|---|---|---|---|---|---|
| 01 | **RT-3** | Retatrutide | 10 mg | Metabolic | zuma-label-01-print.pdf | lots#RT3- |
| 02 | **TZ-2** | Tirzepatide | 15 mg | Metabolic | zuma-label-02-print.pdf | lots#TZ2- |
| 04 | **Tesamorelin** | Tesamorelin | 10 mg | Endocrine | zuma-label-04-print.pdf | lots#TES- |
| 05 | **GHK-Cu** | Copper peptide GHK-Cu | 50 mg | Dermal | zuma-label-05-print.pdf | lots#GHK- |
| 06 | **MOTS-c** | MOTS-c | 10 mg | Metabolic | zuma-label-06-print.pdf | lots#MOT- |
| 07 | **CJC+IPA** | CJC-1295 + Ipamorelin | 10 mg | Endocrine | zuma-label-07-print.pdf | lots#CJI- |
| 08 | **NAD+** | NAD+ | 500 mg | Metabolic | zuma-label-08-print.pdf | lots#NAD- |
| 09 | **BPC+TB** | BPC-157 + TB-500 | 10 mg | Tissue | zuma-label-09-print.pdf | lots#BPT- |
| 10 | **GHK+BT** | GHK-Cu + BPC + TB | 70 mg | Dermal | zuma-label-10-print.pdf | lots#GBT- |
| 11 | **Selank** | Selank | 10 mg | Neuro | zuma-label-11-print.pdf | lots#SEL- |
| 12 | **Semax** | Semax | 10 mg | Neuro | zuma-label-12-print.pdf | lots#SMX- |

Also in the pack: zuma-label-NN-art.png (the same art, 3080 × 1540 px, 1702 dpi) and zuma-label-NN-proof.jpg.

## TO CONFIRM BEFORE ORDERING

- **Lot coding:** who prints the lot and fill date in the box, and how (inkjet or thermal transfer).
- **NAD+ 500 mg:** confirm the fill fits the 3 mL vial; if it moves to a larger vial it needs its own label size.
- **Bacteriostatic water:** sold in a 10 mL vial, so not in this pack. Send its vial size and it gets its own label.
- **Quantities** per SKU, and rolls or sheets.

## RESEARCH USE

Every label carries: For laboratory research use only. Not for human or veterinary use. Keep it on every reprint.
