Vial specification

Three versions, in order of preference. **Option A**: transparent colour spray coating on clear vials, one colour per category, Oxblood screen print, Oxblood cap. **Option B**: plain clear vials, Oxblood screen print, flip-off cap in the category colour. **Option C**: plain clear vials with a printed wrap label, Oxblood cap. Print artwork is supplied as true-size vector PDF.

FOR LABORATORY RESEARCH USE ONLY. NOT FOR HUMAN OR VETERINARY USE.

COMPONENTS

What we need

PART	SPECIFICATION
Vial	3 mL tubular borosilicate glass, clear. 16 mm OD × 35 mm overall height with cap. 13 mm crimp neck. Same vial as current quote.
Stopper	13 mm grey butyl, lyophilization type (as current).
Crimp	13 mm aluminium, silver, natural finish.
Cap	13 mm flip-off. Option A: Oxblood `#6E1C2A` on every SKU. Option B: category colour (see swatches).
Glass finish	Option A: glossy **transparent colour spray coating** on the outside, full body and shoulder, below the crimp. See-through, not frosted. Option B: none, plain clear.
Print	1-colour **screen print**, Oxblood `#6E1C2A`, on top of the coating (A) or on clear glass (B). Fired / cured for alcohol-wipe resistance.
Lot code	Not screen printed. Inkjet on cap top or carton per batch.

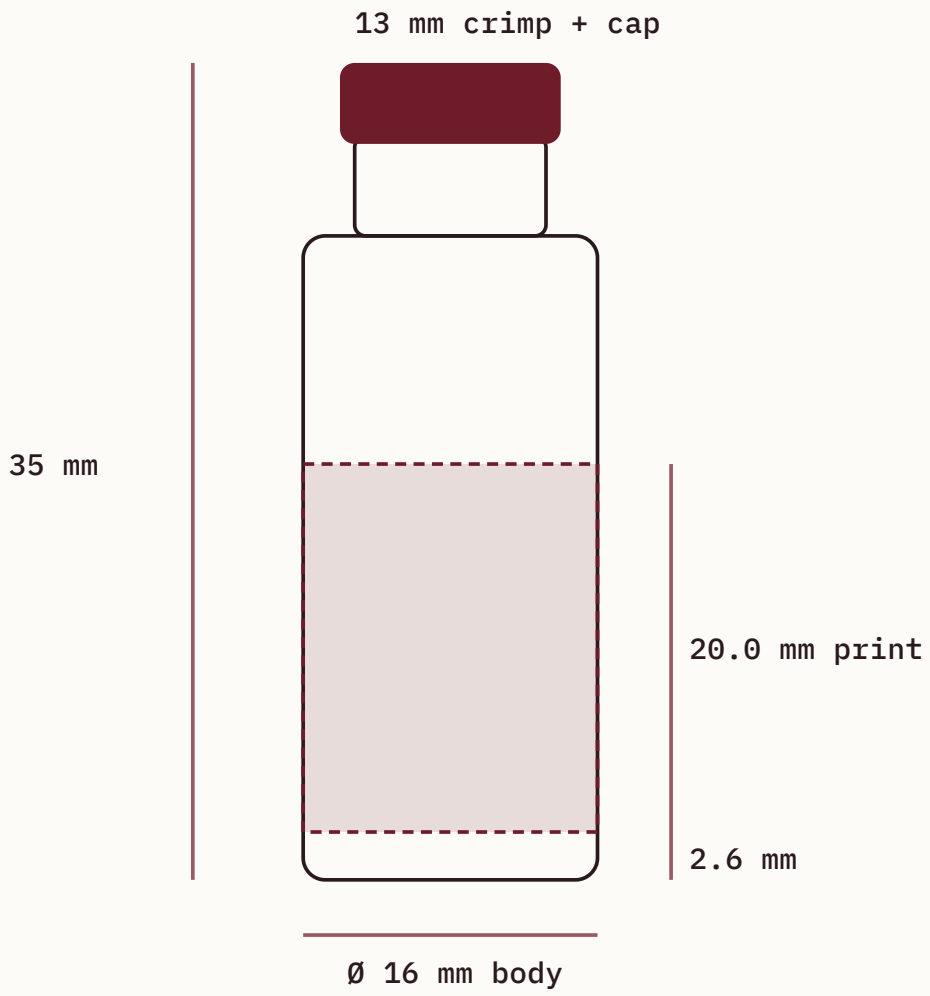

COLOURS · MATCH TO PHYSICAL SWATCH, PANTONE TO BE CONFIRMED ON SAMPLE

Oxblood	Print, cap	`#6E1C2A · RGB 110, 28, 42`
Coral	Dermal	`#FF6A55 · RGB 255, 106, 85`
Lemon	Endocrine	`#F4D63A · RGB 244, 214, 58`
Lime	Tissue	`#6CC93A · RGB 108, 201, 58`
Sky	Metabolic	`#36B3E8 · RGB 54, 179, 232`
Lilac	Neuro	`#A57BF0 · RGB 165, 123, 240`

> Sprayed colour usually reads lighter than the screen. Please send 2–3 samples per colour before production.

PRINT PLACEMENT

Where the print sits

ITEM	VALUE
Print area	20.0 mm tall × 50.3 mm (full wrap, πd)
Bottom edge	2.6 mm above the base
Front centre	25.1 mm from the artwork's left edge
Top ring text	Wraps 360°, continuous; seam falls at the back
Smallest text	Ring type ≈ 0.7 mm cap height. Please confirm minimum line for your screens; we can enlarge.
Files	`print-NN.pdf` vector, true size · `print-NN.png` proof, 50 px/mm

> BAC water (10 mL) is a separate bottle and is not part of this run.

Front, side, back

OPTION B

Plain clear vials

Clear glass, Oxblood screen print, flip-off cap in the category colour (coral, lemon, lime, sky, lilac). Same print files as Option A.

OPTION C

Plain clear vials, printed wrap label

Label	Self-adhesive gloss paper or white BOPP, full-colour digital print, approx. 45 × 20 mm, wraps the body leaving a small gap at the back. Bottom edge 2.6 mm above the base. Please confirm the exact size for your labeller.
Cap	Flip-off, Oxblood `#6E1C2A` on every SKU.
Files	`labels-tricolour-v2/label-NN.png`, 3200 × 1340 px. Lot and fill date are variable data, printed per batch.

PLEASE CONFIRM

Questions for the factory

1. Can you apply **transparent colour spray coating** to these 3 mL vials? MOQ per colour, unit price, setup cost.
2. Does the coating hold up to alcohol wipes, freezer storage (−20 °C) and the lyophilization cycle?
3. Screen print: plate cost per SKU, minimum text size, unit price for 1 colour.
4. Flip-off caps: is Oxblood `#6E1C2A` available or custom? Which category colours are stock?
5. Lead time and samples: 2–3 per colour before production.
6. If spray coating is not possible: Option B (clear + print + coloured caps) price and MOQ.
7. Option C: can you apply wrap labels, or should we label here? Price per labelled vial.
