• Window

A Snow soft-touch carton with a blind-embossed crest and a small Oxblood foil lockup. The front is die-cut with a cluster of Lightbox windows; behind them an inner sleeve printed in the product's one area colour, so the colour only shows through the cuts, like lit panels. The largest window sits on the vial label: the vial in its niche. It ships in an Oxblood matte bubble mailer with the Lightbox grid printed tone-on-tone in gloss, a cropped Snow crest, and "Research, refined." inside the flap.
