ZUMA vacuum bag · print spec

Custom printed vacuum bag, three-side seal · 7 versions, one size · front and back printed · for quotation and sampling

blue dashed: 2 mm bleed (artwork page 74 × 109 mm)

The bag

Type	Vacuum bag, three-side seal. Top edge open: we fill and vacuum-seal it ourselves.
Size	70 × 105 mm finished (W × H). Side and bottom seals 5 mm. Keep the top 12 mm free of seal.
Contents	One vial per bag: 3 mL (Ø 16 × 35 mm), or 10 mL (Ø 24 × 64 mm) for BAC water and NAD+. Please confirm 70 × 105 mm takes the 10 mL vial and still seals.
Film	Food-grade vacuum film (PA/PE or PET/PE), suitable for a chamber vacuum sealer. Please recommend thickness.
Print	Full coverage, both sides, reverse printed. White underlay under all ink (the bag is fully printed, not clear). CMYK + Oxblood spot colour #6E1C2A (please propose the Pantone match).
Finish	Matte preferred. Please quote matte and gloss.
Bottom seal	The research-use line sits 5 mm from the bottom edge: please keep the bottom seal smooth (no knurl) or tell us and we will move the line up.
QR code	On the back, must scan: links to https://zumatides.com/lots. Please scan the proof before printing.

Versions and quantities

#	Version	Artwork file	Qty
1	**Metabolic**	ZUMA-vacuum-bag-metabolic.pdf	3,500
2	**Dermal**	ZUMA-vacuum-bag-dermal.pdf	1,100

	Total		**10,000**

Please answer

- Is the minimum order per version, or can 10,000 be split across 7 versions in one run?
- Cylinder (plate) cost per version, and the total for 7.
- Do you offer digital printing for smaller runs per version? Price and minimum.
- Lead time, sample cost and sample time, shipping to Los Angeles, USA.

The seven versions · proof

Top row front, bottom row back. Blue: trim. Pink: inside the seals and the open top edge. The print files carry no lines.
