Vial label · print spec

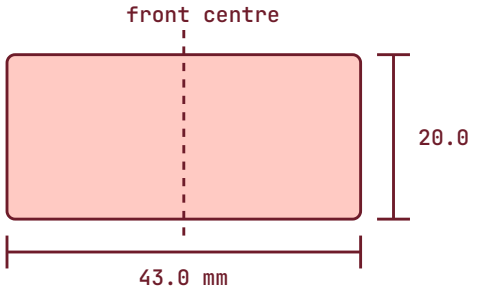

ZUMA Tides · wrap label for the 3 mL vial (Option C: plain clear vial, Oxblood cap) · twelve SKUs · Rev 4 · 3 Nov 2026 (no QR code: the ZUMA star in its place. Rev 3: NAD+ on the 10 mL vial and its larger label)

THE LABEL

Size	43.0 × 20.0 mm trim, corners rounded 1.0 mm. Wraps a Ø 16 mm vial with a 7 mm gap at the back. **Except 03 BAC water and 08 NAD+:** 65.0 × 30.2 mm trim (the same design scaled ×1.51, bleed 2.3 mm, page 69.5 × 34.8 mm) for the standard 10 mL vial, Ø 24 mm, 10 mm gap at the back.
Bleed	1.5 mm all round. Each print file is a 46 × 23 mm page with the bleed built in; no crop marks.
Safe area	1.0 mm inside the trim. Nothing that matters sits outside it.
Material	White polypropylene film (BOPP), permanent acrylic adhesive rated for −20 °C storage, matte laminate. Must hold through freezer storage, condensation and an alcohol wipe.
Print	Digital CMYK, full bleed, one design per SKU. No white ink, no spot colours.
Colour	Match the hex values below. Oxblood #6E1C2A is the brand colour on every label: hard proof it before the run.
Lot box	The white box top-left (LOT, 11.3 × 3.4 mm) stays blank for the lot number: inkjet or thermal transfer at filling. If thermal transfer, order the laminate as TT-receptive.
Left panel	The ZUMA star (no QR code on the vial; the box and the bag carry the link to the lot reports).
Supply	Rolls for an applicator (76 mm core, one across, 3 mm gap; confirm unwind direction with the applicator) or sheets for hand labelling. Order vials + 10% per SKU for set-up and spoilage.

ON THE VIAL

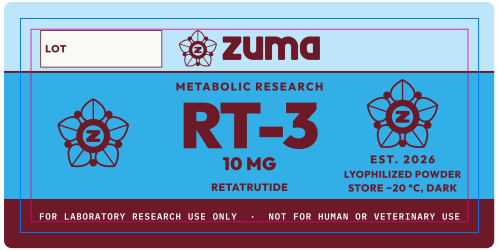

- **Placement:** bottom edge 3.0 mm above the base of the vial (10 mL vials, 03 and 08: 8.5 mm, so the label sits centred on the straight wall); the ZUMA logo and product name centred on the front; the gap at the back.
- **Cap:** 13 mm flip-off, Oxblood #6E1C2A, on every SKU; silver aluminium crimp; grey butyl lyophilization stopper.
- **Vial:** 3 mL clear borosilicate, Ø 16 mm, 35 mm tall with the cap, 13 mm crimp neck.

COLOURS

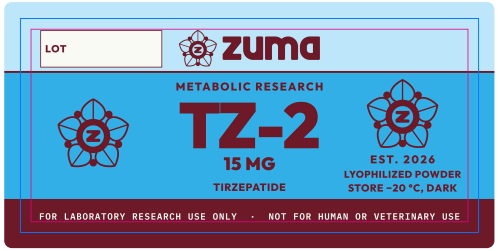

Oxblood #6E1C2A · Coral #FF6A55 (Dermal) · Lemon #F4D63A (Endocrine) · Lime #6CC93A (Tissue) · Sky #36B3E8 (Metabolic) · Lilac #A57BF0 (Neuro). Each label also uses the light tint of its colour for the top band; the files carry the exact values.

THE TWELVE LABELS · PROOFS

Blue: trim. Pink: safe area. Outside the blue line is bleed. The proofs carry the lines; the print files do not.

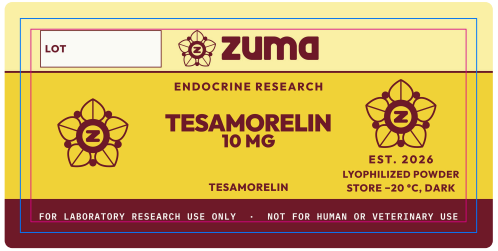

01 · RT-3 · 10 mg

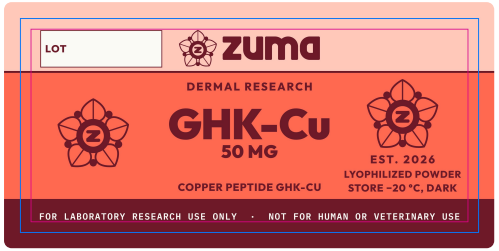

02 · TZ-2 · 15 mg

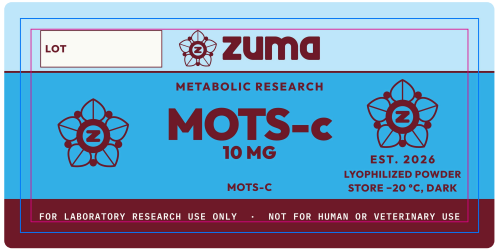

03 · BAC water · 10 mL

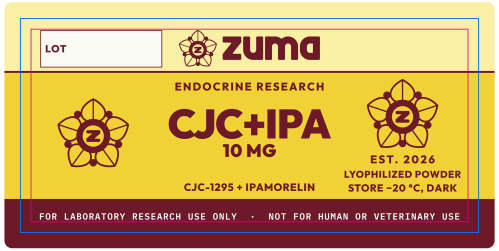

04 · Tesamorelin · 10 mg

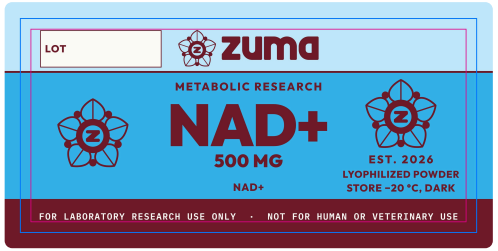

05 · GHK-Cu · 50 mg

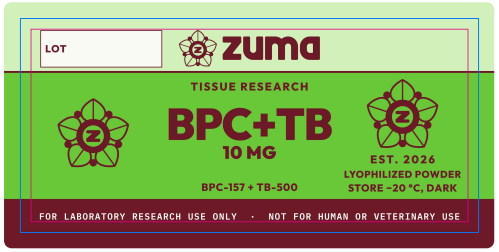

06 · MOTS-c · 10 mg

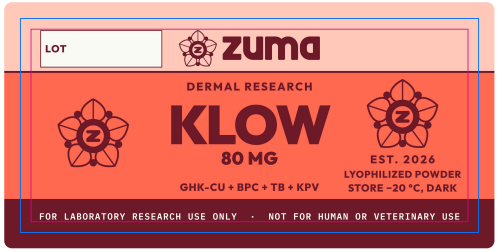

07 · CJC+IPA · 10 mg

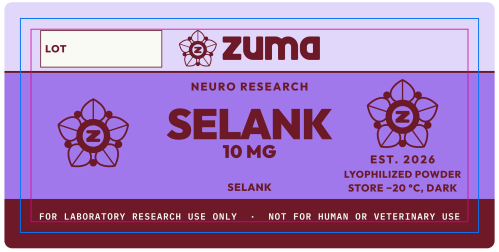

08 · NAD+ · 500 mg

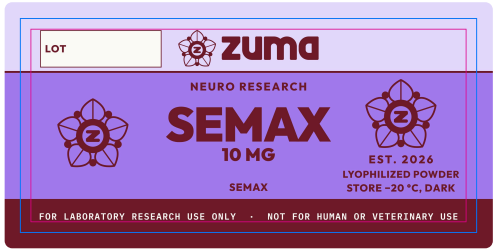

09 · BPC+TB · 10 mg

10 · KLOW · 80 mg

11 · Selank · 10 mg

12 · Semax · 10 mg

FILES AND SKUS

No.	Label	Compound	Fill	Area	Print file
01	**RT-3**	Retatrutide	10 mg	Metabolic	`zuma-label-01-print.pdf`
02	**TZ-2**	Tirzepatide	15 mg	Metabolic	`zuma-label-02-print.pdf`
03	**BAC water**	Bacteriostatic water, 0.9% benzyl alcohol	10 mL · 10 mL vial, 65 × 30.2 mm label	Lab supplies	`zuma-label-03-print.pdf`
04	**Tesamorelin**	Tesamorelin	10 mg	Endocrine	`zuma-label-04-print.pdf`
05	**GHK-Cu**	Copper peptide GHK-Cu	50 mg	Dermal	`zuma-label-05-print.pdf`
06	**MOTS-c**	MOTS-c	10 mg	Metabolic	`zuma-label-06-print.pdf`
07	**CJC+IPA**	CJC-1295 + Ipamorelin	10 mg	Endocrine	`zuma-label-07-print.pdf`
08	**NAD+**	NAD+	500 mg · 10 mL vial, 65 × 30.2 mm label	Metabolic	`zuma-label-08-print.pdf`
09	**BPC+TB**	BPC-157 + TB-500	10 mg	Tissue	`zuma-label-09-print.pdf`
10	**KLOW**	GHK-Cu + BPC + TB + KPV	80 mg	Dermal	`zuma-label-10-print.pdf`
11	**Selank**	Selank	10 mg	Neuro	`zuma-label-11-print.pdf`
12	**Semax**	Semax	10 mg	Neuro	`zuma-label-12-print.pdf`

Also in the pack: zuma-label-NN-art.png (the same art, 3080 × 1540 px, 1702 dpi) and zuma-label-NN-proof.jpg.

TO CONFIRM BEFORE ORDERING

- **Lot coding:** who prints the lot number in the box, and how (inkjet or thermal transfer).
- **Bacteriostatic water (03) and NAD+ (08):** labels sized for a standard 10 mL vial (Ø 24 mm, straight wall about 35 mm). Confirm against the real vial.
- **Quantities** per SKU, and rolls or sheets.

RESEARCH USE

Every label carries: For laboratory research use only. Not for human or veterinary use. Keep it on every reprint.
